Install Instructions for Deltek Costpoint IIS DEProxy DLLs (January 2026)

This document provides the required steps to install the updated Internet Information Services (IIS) DEProxy Dynamic Link Libraries (DLLs) for Costpoint. These instructions must be completed in the order listed below to ensure that the new DLLs are properly deployed and recognized by IIS.

Note: Costpoint QR 2026.2.0 will include these DEProxy DLLs. Installing any quarterly release (QR) earlier than 2026.2.0 will overwrite these DEProxy DLLs. If you apply a prior QR, you must repeat the steps in this document after the QR installation is complete.

To install IIS DEProxy DLLs:

1. Stop your Costpoint Service.
2. Back up and remove all current DEProxy plug-in files from the Costpoint installation directory (typically `c:/Deltek/Costpoint/82/applications/DEProxy`).

Note: Ensure that you preserve the `iisproxy.ini` file located in the `lib` folder.

3. Extract the contents of `IIS_DEProxy_dlls_Jan_2026.zip` into the DEProxy directory where the current plug-ins were removed (typically `c:/Deltek/Costpoint/82/applications/DEProxy`).
4. After you replace the files, restore the original `iisproxy.ini` file to the `lib` folder.
5. Open IIS Manager and restart your IIS server.
6. Start your Costpoint Service.
7. Verify the installation by logging in to Costpoint through IIS.
8. If your environment invokes web services (WS) through IIS, ensure that those services are also using the updated DLLs copied in step 3. For details, see Appendix B of the *Deltek Costpoint 8.2 Integration Overview*

document, or click this link: [Accessing Integration Services from Costpoint Servers](#).

You can use Deltek Software Manager (DSM) to download complete Deltek products, hot fixes, cumulative updates, and sub-releases. You can access DSM through the Deltek Support Center or use Deltek Software Manager Lite to download Deltek products.

Accessing DSM from within the Deltek Support Center

To access DSM from within the Deltek Support Center:

1. In your Web browser, go to <https://deltek.custhelp.com>.
2. Enter your Deltek Support Center Username and Password and click **Login**.
3. When the Deltek Support Center page displays, click **Product Downloads**.
4. On the Deltek Software Manager screen, click **Launch Deltek Software Manager**.
5. Click **Settings** at the top right of the dialog box to use the Settings dialog box to specify the folder where you want to download Deltek products and click **OK**.

Note: When you log on for the first time, DSM asks you to select a default folder where Deltek products are to be downloaded.

You can change this folder anytime in the Settings dialog box.

6. In the left pane, expand the Deltek product that you want to download, if it is not already expanded.
7. Select the product type that you want to download.

Options include:

- Complete
- Cumulative Updates
- HotFixes
- Sub-Release

8. In the table, select the check box that corresponds to the Deltek product that you want to download.

The right pane displays a message stating that the product has been added to the download queue.

Note: To view the items in the download queue, click [View Download Queue](#) at the bottom of the left pane.

9. Click **Download** at the bottom of the left pane to download the product to the folder that you selected.

Accessing DSM Lite

To access Deltek Software Manager Lite:

1. In your Web browser, go to <https://dsm.deltek.com/DeltekSoftwareManagerLite>.
2. Enter your Deltek Support Center **Username** and **Password** and click **Logon**.
3. When the Deltek Software Manager Lite page displays, select a product from the drop-down list.
4. Click the product type that you want to download.

Note: The download behavior and download folder may differ depending on the browser and browser settings that you are using.
