

This guide highlights the features and enhancements in the Deltek Learning Zone (DLZ) 17.1 release.

- ✓ **Mandatory Product Association**
- ✓ **Auto-Generate Single Registration Link**

Mandatory Product Association

To find the relevant training you need, at least one Deltek product in your profile must be selected. To support you in this process, we have made the product field mandatory.

For new users, choosing a Deltek product is now a mandatory field during DLZ registration.

Existing users who have not yet selected a Deltek product in their User Profile will be required to choose one on their next log in after the 17.1 update.

Note: Users who have previously selected a Deltek product will not be required to do this.

DLZ PRODUCTS *

- Ajera
- Vision
- Costpoint**
- Maconomy Power Up
- Maconomy DFME
- Deltek for Professional Services

Auto-Generate Single Registration Link

To save time for POCs, we have expanded the auto-registration link functionality so that it is also included in the welcome email.

This means the POC can simply forward the welcome email to end users when they're ready to start their training, making the registration process quicker and easier for everyone.
